

WTH© Conference, Calendar & Scheduling

Module Features

Screen shots

Calendar View

Events

- Create an unlimited number of events.
- Create recurring events based on daily, weekly, monthly or yearly options.
- Display an unlimited number of events per day.
- Create events that span several days.
- Create partial day events by specifying the start and end time or full day events.
- Assign event to a DNN role, so only users in that role can view / sign up to the event.
- Assign events to categories to allow filtering when viewing in calendar or list view.
- Optionally assign number of spaces available.
- Optionally assign cost to the event or leave as free.
- Optionally assign maximum number of spaces a customer can book per transaction.
- Mark event as "active" or "inactive" - if inactive

List View:

WTH© Conference, Calendar & Scheduling

event will not be displayed in the calendar, RSS feed and users will not be able to sign up to the event.

- Once user booking has a status of paid, optionally add user to DNN role and optionally define how long they should be in the role for.
- Support tiered pricing e.g. separate price for children and adults.
- Option to auto-remove an event from the calendar when all spaces have been booked.
- Optionally assign a color to an event via a Query color picker, so when the event is displayed on the calendar it uses that color.
- "Duplicate event button" when clicked will create an exact copy of the event this will make adding new events quicker.
- Import events via CSV file.

Recurring Events

- Create recurring events based upon complex parameters such as:
- **Daily:** Every X days. Every weekday.

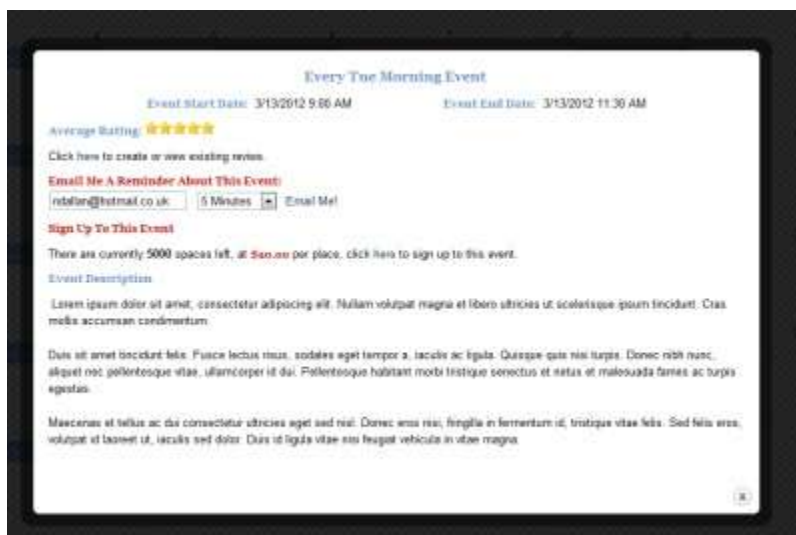

On Hover Event Summary Displayed

WTH© Conference, Calendar & Scheduling

- **Weekly:** Recur every X weeks on the days you specify.
- **Monthly:** Recur every day of every X months. Recur every 1st, 2nd, 3rd, 4th or last day/weekday/day of every X months.
- **Yearly:** Recur yearly on the specific month and day you enter.

View Event Details In Modal Window

Event Registration

- Optionally allow users to sign up for events.
- Take payment for events.
- Auto-populates booking form with DNN profile information if user logged in.
- Optionally allow anonymous users to place bookings i.e. they don't need to register for an account on your portal.
- Simple 2 stage checkout process
- User booking module so they can view bookings they have made.
- Admin booking module so they can view and administrate all bookings made.

WTH© Conference, Calendar & Scheduling

- The following currencies are supported: USD, GBP, Euro, Australian dollar, Canadian dollar and Swiss franc.

Admin Options

- Simple payment configuration settings
- Allow admin to define an "Event Management" and "Booking Management" DNN role that would allow users in that role to management events or booking but not have access to the payment admin or core module settings.

Event Notifications

- Optionally allow users to sign up and automatically receive an email notification about an event.
- Let the user pick the date when they will receive the email notification - time periods ranging from 5 minutes to 2 weeks!
- Via the admin interface manually send out email notifications about events.

WTH© Conference, Calendar & Scheduling

Calendar Views

- Switch between calendar or list view mode.
- Allow admin to define default page view either "calendar" or "list view".
- Define the default if using calendar view e.g. "month", "week" or "day".
- View events as a list - rather than just having a standard calendar view, allow the user to view the events as a list.
- When user hovers mouse over an event a Query popup will appear showing a summary of the event.
- Main event details displayed in Query modal popup box.
- Allow users to search for events.

Event Widget Satellite Module

- Separate module that can be added to any page on your DNN site to display events.
- Fully template and token

WTH© Conference, Calendar & Scheduling

driven, each module can have its own unique template

- Full control over the events that are displayed in the module

Discount Coupons

- Create an unlimited amount of coupons that can be distributed to create a promotion or give specific users a discount.
- Define rules for each coupon. e.g. minimum subtotal, can be used multiple times, start date, end date, customer email address, etc.
- Offer a monetary or percentage discount.
- User enters coupon at point of checkout optionally verify the coupon has not been used before or that the coupon belongs to the customer attempting to use it.
-
- Support for creating 100% discount coupons.

***WTH*© Conference, Calendar & Scheduling**

RSS Feed

- Optionally display an RSS 2.0 feed based on the events you have published.
