

Celebrating 15 years of services to our Clients 1994 - 2009

Dear Connecticut Clerk,

IMAS releases **Scan, Print, View-SPV**© platform for your **Vitals Recording System-VRS**©.

Keep records pristine, accurate, safe and instantly accessible with our new **SPV**© function for **VRS**©. Eliminate the cumbersome process of accessing vital records in notebooks—no more plastic sleeves and copy machines.

This new update of **Vitals Recording System-VRS**© will enable you to print to any printer in your office without alignment. This new version produces:

- Your choices of form VS-3 Rev 11/08
or from VS-3 Rev 07/03
- the registry for the front of your vitals binder books
- the long index to vitals (merged or separated)
- state revenue form
- the ability to print a new vital record onto a blank sheet of paper (PDF form) eliminating the alignment process
- the ability to scan-in the officiated Vital record for safe keeping and Inquiry look-up
- the ability to re-dact anything at the time of printing a copy

For about the cost of two copies per month, with prices starting at \$19.95 per month, this new version of **VRS**© also allows Internet requests for vital record copies from your community's webpage or IMAS' WebTownHall webpage, enabling you to plan your work load in advance and serve the public efficiently.

I look forward to talking with you.

John
